Marco Antonio Cubaque Porras

Software Engineer | DBA | Application Development Expert
Bogota, D.C., Capital District, Colombia

Summary

If I could dedicate my life to one thing, it would be learning. Throughout my professional career, I have had the privilege of immersing myself in a wide spectrum of technological knowledge. From mastering various technologies to adopting innovative approaches and agile methodologies, my career has been a constant adventure of growth and discovery. Beyond programming and solving technical problems, I have greatly valued the importance of teamwork and creating a collaborative and productive work environment. I love inspiring and motivating my team to reach their full potential and together achieve exceptional results. Although my main focus has been on the development and administration of databases, I have also explored other areas of software development with enthusiasm. I have had the opportunity to work on multi-platform web-oriented projects, where I have been able to apply my technical expertise and creativity to develop innovative solutions.

Experience

Atica -Industria Ambiental
Database Administrator
November 2021 - April 2023 (1 year 6 months)
Madrid Cundinamarca

SQL Server, MySQL, Python, Power BI, Excel.

Design and administration of network technology infrastructure.
Modeling database logical structure
Management of risks associated with information and communications technology solutions.
Develop dynamic reports
Implementation and control of the information security system.
Supervision of subordinate personnel.

Successful implementation of an Information Management and Security System: I designed comprehensive policies and protocols to efficiently and securely manage data. I led the implementation of an advanced technological solution that improved information accessibility, optimized operational efficiency, and strengthened regulatory compliance.

SyT Comunicaciones

Database Administrator

July 2020 - September 2021 (1 year 3 months)

Bogotá, Distrito Capital, Colombia

PHP, MySQL, Wordpress, Git.

Design and development of computer applications.

Evaluation of computer application requirements.

Develop scalable new features

Services optimizations

Instance Monitoring

Document and Respond to integration clients

Testing of computer applications

Implementation of computer applications.

- Comprehensive System Development: I was responsible for conceiving, developing, and executing a robust customer management system, including centralized customer data administration, alert generation, and customized notifications.
- Improvement of Customer Experience: The implementation of this system allowed for an enhanced customer experience by providing real-time relevant information addressing individual customer needs.
- Increase in Retention and Loyalty: Significant increase in customer retention and loyalty, enhancing overall customer satisfaction.
- Process Automation: Automation of repetitive manual tasks, resulting in increased operational efficiency and enhanced ability to provide faster and more accurate service to customers.

Education

Politécnico Grancolombiano

Grado en Ingeniería, Ingeniería de software · (October 2021 - December 2023)

Servicio Nacional de Aprendizaje (SENA)

Tecnólogo, Tecnología/Técnico de software informático · (2017)
