Marco Antonio CubaquePorras

Developer -Database Administrator

Bogotá, Capital District, Colombia

Extract

Software Engineer with a solid base in Analysis and Development of Information Systems, I specialize in the development and administration of databases. My experience also covers the development of cross-platform web-oriented applications.

In an ever-changing technological world, I stay at the forefront of the latest, safest and most reliable technologies.

My goal is to provide high-quality solutions in any technological domain.

Experience

Attica- Industria Ambiental

Database administrator

November 2021 - April 2023 (1 year 6 months)

Madrid, Cundinamarca, Colombia

In my role as a database administrator, I led the implementation of technical standards and methodologies for data center design and management.

My responsibilities included:

- Design and administration of network technological infrastructure.
- Risk management of information and technology solutions communications.
- Implementation and control of the information security system.
- Supervision of personnel in charge.

Notable

achievements: • Successful implementation of an Information Management and Security System: I designed comprehensive policies and protocols to manage data efficiently and safely. Led the implementation of an advanced technological solution that improved information accessibility, optimized operational efficiency, and strengthened regulatory compliance.

SyT Comunicaciones

Database administrator

July 2020- September 2021 (year 3 months)

Bogotá, Capital District, Colombia

At SyT Communications, I played a key role in the development of computer applications and the integration of digital components. My Responsibilities included:

- Design and development of computer applications.
- Evaluation of computer application requirements.
- Computer application tests.
- Implementation of computer applications.

Outstanding

achievements: • Comprehensive System Development I was responsible for conceiving, developing and running a robust customer management system, including centralized customer data management, alert generation, and personalized notifications.

• Improved Customer Experience: The implementation of this system allowed us to offer an improved customer experience by providing relevant information in real time that meets the needs of individual clients.

• Increased Retention and Loyalty: Significant increase in customer retention and loyalty, improving overall customer satisfaction.

• Process Automation: Automation of repetitive manual tasks, resulting in greater operational efficiency and a greater ability to provide faster and more accurate service to customers.

Education

Politecnico Grancolombiano

Degree in Engineering, Software Engineering (October 2021 -December 2023)

Servicio Nacional De Aprendizaje SENA

Technologist, Technology/Computer Software Technician (2017)
