CAREER PROFILE

Software Engineer and Database Administrator with 5+ years of experience designing, optimizing, and migrating enterprise data environments. Specialist in SQL Server, MySQL, and PostgreSQL, with strong focus on high availability, performance tuning, and backend development with Python and Flask.

Currently a Senior Professional in Process Automation at Fiduprevisora S.A. (Treasury Department, Financial VP), applying server administration, SQL database management, and process automation to treasury operations. Previously led AI-powered automation and full-stack development at AGS Colombia - including an end-to-end recruitment and performance-evaluation system, the HU Tracker project management platform, and n8n pipelines syncing government data (REPS, SECOP II) - combining deep DBA expertise with application development. Earlier experience includes building PostgreSQL HA clusters with Patroni, HAProxy, and Docker at RithmXO (Lindon UT, remote). Open to relocation and international opportunities.

SKILLS

Programming & Backend:	Python, Flask, FastAPI, JavaScript
Databases:	SQL Server (T-SQL), PostgreSQL, MySQL
Infrastructure:	Docker, Patroni, HAProxy, Git, Linux
AI & APIs:	OpenAI API, Groq API, GLPI API
Frontend:	Bootstrap 5, HTML, CSS, Chart.js
Methodologies:	Scrum / Agile (SFC Certified)

EXPERIENCE

Senior Professional 1 - Process Automation

August 2026 - Present

Fiduprevisora S.A. - Treasury Department, Financial VP - Bogota, Colombia (Hybrid)

- Server administration and SQL Server database management within the Treasury Department, Financial VP.
- Design and implementation of process automations for treasury and financial operations.

AI Automation Engineer

July 2026 - August 2026

AGS Colombia SAS

Stack: Python/Flask, PostgreSQL, MySQL, n8n, LLMs (Groq/OpenAI), Docker, systemd, SMTP, WinRM

- Designed and automated the full recruitment and performance evaluation cycle: automatic candidate-vacancy matching via weighted scoring, AI-based resume data extraction, and automated notifications at every stage of the selection pipeline, from application to hiring.
- Built HU Tracker, an in-house platform (Flask + PostgreSQL) for managing user stories, tasks, sprints, and dependencies, with internal automations: status-based owner reassignment, recurring tasks, due-date alerts, AI-generated Daily Standup agendas and PDF meeting minutes, automatic backup monitoring via WinRM across 3 servers, and real-time GLPI integration.
- Designed an n8n workflow that syncs ~61,000 records daily from a government portal (REPS) into MySQL with no duplicates, replacing a manual process and optimized to a stable 64 seconds; plus the SECOP II Monitor pipeline, with daily ingestion via public API, AI-based opportunity classification (Groq/Llama 3.3), and automated email notifications to the sales team.
- Built two multi-client usage audit dashboards (systemd) with Excel and PDF export.

Database Administrator

October 2025 - June 2026

AGS Colombia SAS

Stack: SQL Server, MySQL, PostgreSQL

- Management, monitoring, and optimization of SQL Server and PostgreSQL environments, ensuring availability and efficiency.
- Designed and optimized relational schemas in SQL Server, MySQL, and PostgreSQL for mission-critical corporate applications.
- Collaborated with Technology, HR, and Finance teams in requirements gathering, technical design, and production deployments.

Database Administrator Engineer

March 2024 - September 2025

RithmXO - Lindon, UT (Remote)

Stack: SQL Server, MySQL, PostgreSQL, Python, Docker, Patroni, HAProxy, Linux

- Administration and optimization of SQL Server and PostgreSQL instances across Linux and Windows environments.
- Led migration of MSSQL databases to PostgreSQL, reducing licensing costs and improving scalability.
- Designed and deployed a PostgreSQL HA cluster using Docker, Patroni, and HAProxy - achieving automatic failover and load balancing.
- Implemented proactive monitoring and alerting systems, preventing critical production incidents.
- Optimized queries and indexes, significantly reducing execution times on high-traffic workloads.
- Standardized data modeling criteria and documented stress-test procedures across all environments.

Database Administrator

November 2021 - April 2023

Atica - Industria Ambiental

Stack: SQL Server, MySQL, Python, Power BI, Excel

- Design and administration of network and database infrastructure.
- Relational data modeling and logical structure design.
- Development of dynamic reports and dashboards (Power BI).
- Implementation and control of the information security management system.
- Designed comprehensive security policies; led data management solution improving accessibility, efficiency, and regulatory compliance.

Database Administrator & Web Developer

June 2020 - June 2021

SyT Comunicaciones

Stack: PHP, MySQL, WordPress, Git, HTML, CSS, Bootstrap

- Design and development of web applications and computer systems.
- Service and database query optimization; instance monitoring and incident response.
- Developed customer management system with centralized data, automated alerts, and personalized notifications.

EDUCATION

Software Engineering (B.Sc.)

2021 - 2023

Politecnico Grancolombiano - Bogota, Colombia

Systems Analysis & Development (A.S.)

2017 - 2020

SENA - Manizales, Colombia

CERTIFICATIONS

- **Scrum Fundamentals Certified (SFC)** SCRUMstudy | 2022
- **Database Administrator** Carlos Slim Foundation | 2020
- **Data Curator** Carlos Slim Foundation | 2020
