CAREER PROFILE

Software Engineer and Database Administrator with 5+ years of experience designing, optimizing, and migrating enterprise data environments. Specialist in SQL Server, MySQL, and PostgreSQL, with strong focus on high availability, performance tuning, and backend development with Python and Flask.

Currently at AGS Colombia, leading full-stack development of internal enterprise platforms - including an AI-powered recruitment system (OpenAI/Groq) and a project management tool with Kanban, sprints, and time tracking - combining deep DBA expertise with application development. Previous experience includes building PostgreSQL HA clusters with Patroni, HAProxy, and Docker at RithmXO (Lindon UT, remote). Open to relocation and international opportunities.

SKILLS

Programming & Backend:	Python, Flask, FastAPI, JavaScript
Databases:	SQL Server (T-SQL), PostgreSQL, MySQL
Infrastructure:	Docker, Patroni, HAProxy, Git, Linux
AI & APIs:	OpenAI API, Groq API, GLPI API
Frontend:	Bootstrap 5, HTML, CSS, Chart.js
Methodologies:	Scrum / Agile (SFC Certified)

EXPERIENCE

Database Administrator & Software Developer

October 2025 - Present

AGS Colombia SAS

Stack: Python, Flask, SQL Server, MySQL, PostgreSQL, Bootstrap 5, OpenAI/Groq API, GLPI API, Chart.js, openpyxl, fpdf2

- Full-stack development of enterprise internal applications for medical audit, HR, and project management.
- Built GestionRH: full-cycle recruitment platform with 7-stage pipeline, AI-powered CV parsing (OpenAI/Groq), candidate compatibility scoring 0-100%, and automated email notifications.
- Built HU Tracker: internal project management tool with Kanban board, sprint planning, time tracking (Clockify-style), task dependency graph (DAG), and GLPI ticketing integration.
- Designed and optimized relational schemas in SQL Server, MySQL, and PostgreSQL for mission-critical corporate applications.
- Collaborated with Technology, HR, and Finance teams in requirements gathering, technical design, and production deployments.

Database Administrator Engineer

March 2024 - September 2025

RithmXO - Lindon, UT (Remote)

Stack: SQL Server, MySQL, PostgreSQL, Python, Docker, Patroni, HAProxy, Linux

- Administration and optimization of SQL Server and PostgreSQL instances across Linux and Windows environments.
- Led migration of MSSQL databases to PostgreSQL, reducing licensing costs and improving scalability.
- Designed and deployed a PostgreSQL HA cluster using Docker, Patroni, and HAProxy - achieving automatic failover and load balancing.
- Implemented proactive monitoring and alerting systems, preventing critical production incidents.
- Optimized queries and indexes, significantly reducing execution times on high-traffic workloads.
- Standardized data modeling criteria and documented stress-test procedures across all environments.

Database Administrator

November 2021 - April 2023

Atica - Industria Ambiental

Stack: SQL Server, MySQL, Python, Power BI, Excel

- Design and administration of network and database infrastructure.
- Relational data modeling and logical structure design.
- Development of dynamic reports and dashboards (Power BI).
- Implementation and control of the information security management system.
- Designed comprehensive security policies; led data management solution improving accessibility, efficiency, and regulatory compliance.

Database Administrator & Web Developer

June 2020 - June 2021

SyT Comunicaciones

Stack: PHP, MySQL, WordPress, Git, HTML, CSS, Bootstrap

- Design and development of web applications and computer systems.
- Service and database query optimization; instance monitoring and incident response.
- Developed customer management system with centralized data, automated alerts, and personalized notifications.

EDUCATION

Software Engineering (B.Sc.)

2021 - 2023

Politecnico Grancolombiano - Bogota, Colombia

Systems Analysis & Development (A.S.)

2017 - 2020

SENA - Manizales, Colombia
